

## SPRING 2018 - STUDENT'S COMMENTS

- A really good professor. Was very helpful and always available when I needed extra help.
  - Amazing professor, i wish he taught all of my classes.
  - Best math professor I have ever taken.
  - Best professor in the course
  - Caglar is probably the best thing to happen to the FIU math department. He has a genuine concern for his students, loves to make sure that we actually understand the material and goes above and beyond if we dont.
  - Coherent and fair instructor who knows what he is talking about.
  - Professor Caglar has been a very good Pre-Cal professor. He is really good at explaining the problems thoroughly to allow the students to really understand the topic. If a study still doesn't understand, he will explain it once again and try to make it easier for the class. He's very understanding, and helps you if you are struggling. I will look for him as a my instructor for future classes.
  - Professor made an effort to help students learn the course material , he was very helpful and made things easier to understand. He graded fairly and promptly.
  - Such an amazing math teacher, couldn't have been more satisfied. He's very helpful and always available when you need him or have any questions. Will be taking him for another subject.
  - The greatest professor I have had since attending FIU.
  - Umut is a well rounded professor who shows concern for all his students
- 
- Amazing professor and very fair. I was part of the first hybrid trigonometry course and I couldn't be happier with the structure of this course. It's very consistent and feels like a routine. Class lectures were short but helpful since they would clear up any doubt I had about the material and the online homework would then reinforce that knowledge. I only wish that lectures were more interactive and engaging with students. Other than this I had a very pleasant experience with professor Caglar.
  - Dr. Caglar takes time to explain concepts that students need explained when they ask. He is very available to help students and demonstrates this when he reviews course materials before tests. He is very knowledgeable about the material he teaches and is able to go into detail as needed.
  - Excellent professor that cares for his students and strives to teach the content to the best of his ability. He goes over concepts extensively and while this can often take up too much class time, it benefits the class. Overall, he is a great instructor that teaches clearly and effectively while being understanding and helpful towards his students.
  - Excellent professor, he explained the material so well, knew it very well, and genuinely cared about the students success and passing the class.
  - Excellent teacher

- Great professor ive had him two years in a row i would take him again if i could
- He's one of best math professor in FIU. He's fair with his students.
- One of the best math professors I have ever taken in my life.
- Professor Caglar taught very well and helped his students as much as possible.
- This class was very helpful.
- Umut teaches very well and he was a big part of my success in my class. He was a great professor and would recommend to anyone.
- Very happy to have caglar as my professor, i think the only negative that i had for this class was the grading of the pre class and offline by the LA
- best math teacher I have ever had.
- the best math professor , so caring for his students , gives clear example and explains clear.

- Awesome teacher, really cares about his students and teaches in a way we can understand.
- Best teacher I've had at fiu.
- Excellent teacher, well spoken, repetitive and generally cares about the his students.
- Hands down the best math professor that i have ever had. He always went above and beyond and made sure that we had the fundamentals of all of the lectures. Let us know from the beginning of the semester the expectations that we all should have and kept us pushing forward. Hands down the best professor that i had this semester and from attending the math lab every week and attending all of the study reviews the best math teacher that i have come across in the university. Highly recommend
- Professor Umut is very clear and understanding as an instructor. He truly wants his students to reach their full potential and takes the time to answer any question asked.
- Professor Umut is very helpful when answering questions we were stuck on in the homework.
- The best math professor I have had at FIU. I hope he teaches calculus
- The professor made this class very easy to understand and follow.
- This professor was very patient but clear in his teaching techniques. He was very understanding
- great teacher, much better than my last one
- he was a really good instructor and fair.
